## How this affects your energy bills

An average household would need to spend **£2,491 per year on heating, hot water and lighting** in this property. These costs usually make up the majority of your energy bills.

You could **save £778 per year** if you complete the suggested steps for improving this property's energy rating.

This is **based on average costs in 2024** when this EPC was created. People living at the property may use different amounts of energy for heating, hot water and lighting.

### Heating this property

Estimated energy needed in this property is:

- 18,317 kWh per year for heating
- 2,286 kWh per year for hot water

Properties get a rating from A (best) to G (worst) on how much carbon dioxide (CO<sub>2</sub>) they produce each year.

### Carbon emissions

An average household produces **6 tonnes of CO<sub>2</sub>**

This property produces **6.2 tonnes of CO<sub>2</sub>**

This property's potential production **3.1 tonnes of CO<sub>2</sub>**

You could improve this property's CO<sub>2</sub> emissions by making the suggested changes. This will help to protect the environment.
